- Clean code:

Documentation

User.md

<https://github.com/bteger508/secure-sms-chat-plugin/blob/master/Documentation/User.md>

Deployment

<https://github.com/bteger508/secure-sms-chat-plugin/blob/master/Documentation/Deployment.md>

Development

<https://github.com/bteger508/secure-sms-chat-plugin/blob/master/Documentation/Development.md>

SQL

<https://github.com/bteger508/secure-sms-chat-plugin/blob/master/Documentation/SetupDockerSql.md>

Feedback

Mentor Feedback:

- Consolidate project files to the same repository
- Focus on features and functionality

Client Feedback:

- Approval for iteration 3 features
- Reworking endpoints
- -AddNewtonsoftJson();
- Think about creating new solutions and rebuilding with current project files.

4th Iteration Features

- Microsoft Identity for database and user authentication
- Explore (and potentially implement) use of iFrame for plugin

Teamwork

- Ben Eger - Frontend data handling and querying
- Mercedes Thompson - Frontend data handling and querying, CSS
- Nicole Gerber - User authentication and Microsoft Identity research
- Ethan Holland - Docker and Database
